**Coal Miners' Commemorative Postage Stamp
PETITION**

We, as citizens of the United States of America, petition the Citizens' Stamp Advisory Committee of the United States Postal Service to approve and issue a commemorative postage stamp honoring the achievements and contributions that the coal miner has made to our nation's economy and well being.. Billions of tons of coal have been, and will continue to be, extracted from the mines in 26 states in our country for use in industry and households. Little recognition has been given to the coal miner who worked long hours in poor working conditions in order to make the United States of America the economic and military power it is today.

Please sign this petition so that the United States Postal Service will issue a stamp honoring coal miners.
